Rethink the Accounting Classroom

Flip the classroom. Engage your students. Relax.

Studies show that students often skip doing the out-of-class reading that's required before lectures begin. This makes it difficult for them to grasp concepts and succeed in the course.

We've partnered with AME Learning to offer courseware solutions that incentivize students to do their pre-class work. The AME Engage™ learning environment and its corresponding courseware flip the classroom, challenging students to complete pre-class tutorials and allowing you to track their progress.

See pages 8–11 for details about the available courseware.

AME ENGAGE™

Introduction to Accounting: Concepts and Applications, Version 1.0

Suzanne Long, Jackson College
© 2018

Introduction to Accounting: Concepts and Applications, V1.0, is designed for the non-accounting major who must have an understanding of financial and major accounting as it is used in decision making. The courseware provides an accessible introduction to accounting for students coming to the subject for the first time. It embraces the basic techniques and underlying theoretical concepts in accounting and shows how these are applied in various circumstances.

Students learn about annual reports, financial statements, balance sheet accounts, and accounting transactions. The focus is on how accounting information is used in decision making and not only the mechanics behind that accounting information. A full introduction and practice of the accounting cycle will be presented, followed by accounting application topics used in business today. Application topics include cash management, fraud prevention, receivables analysis, depreciation basics, payroll, financial statement analysis, and more.

Contents

1. Personal Accounting
2. Linking Personal Accounting to Business Accounting

Financial Accounting Principles, Version 4.0

Neville Joffe and Penny Parker
© 2018

Financial Accounting Principles, V4.0, frames the study of financial accounting in a highly practical, fully integrated and interactive learning experience. Most students who enter into their first accounting course have little experience with their own finances, let alone accounting.

Financial Accounting Principles, V4.0, starts from a student's point of view, to give the student a big picture understanding of how the language of accounting applies to them. Once students are comfortable with the logic and principles, the courseware moves to the business context.

AME ENGAGE™

Students are exposed to all foundational concepts in financial accounting, including partnerships and corporations. This approach has led to a significant improvement in engagement and grades, combined with a significant reduction in drop-outs and failures.

Managerial Accounting Principles, Version 3.0

Dr. Jeffrey L. Hillard, BS, MSM, DM, CMA, CPA, Notre Dame of Maryland University; Dr. Anthony A. Atkinson, FCMA, FCPA, Wilfrid Laurier University; and John Wiley, BS, Med, Baltimore City College
© 2019

Managerial Accounting Principles, V3.0, frames the study of managerial accounting in a highly practical, fully integrated, and interactive learning experience.

This course material provides options for students to either follow traditional problem-solving methods or a new, straightforward, and Excel-based method that eliminates the need for memorizing formulas.

This version introduces a unifying conceptual framework that links all topics throughout the courseware to making important managerial decisions, as well as integrating positive business ethics. In addition to the traditional use of manufacturing businesses, the courseware also uses service, retail, and technology examples extensively to reflect the realities of today's economy. This approach has led to a significant improvement in engagement and grades, combined with a significant reduction in drop-outs and failures.

Hospitality Financial Accounting, Version 1.0

Neville Joffe
© 2018

Hospitality Financial Accounting, V1.0, is the perfect resource for hospitality accounting courses with an introductory financial accounting focus.

Most hospitality accounting programs are simply highly technical accounting textbooks brushed-over with hospitality examples. This courseware, on the other hand, is designed for its audience, offering the perfect student-focused exposure to accounting and the right mix of content for future managers in the hospitality industry.
